

CORRECTION

Open Access

# Correction to: CRISPR/Cas9-targeted mutagenesis of Os8N3 in rice to confer resistance to *Xanthomonas oryzae* pv. *Oryzae*

Young-Ah Kim<sup>1†</sup>, Hyeran Moon<sup>2†</sup> and Chang-Jin Park<sup>1,2,3\*</sup>

**Correction to: Rice 12:67**

<https://doi.org/10.1186/s12284-019-0325-7>

It was highlighted that in the original article (Kim, 2019) all PCR bands in Fig. 3a did not appear. This Correction article shows the correct Fig. 3. The original article has been updated.

Full list of author information is available at the end of the article

**Fig. 3** Generation of transgenic rice plants carrying the Cas9 transgene with a sgRNA targeting the Os8N3 gene. Genotyping was performed using the specific primers for Cas9, Cas9\_RT\_F and Cas9\_RT\_R (see Fig. 2b), from four independently transformed plants and their progenies (OsU6a xa13m/Kit T<sub>0</sub>, T<sub>1</sub>, T<sub>2</sub>, and T<sub>3</sub> generations). Genomic DNAs were extracted from Kit (Kitaake) and OsU6a xa13m/Kit T<sub>0</sub> (a), T<sub>1</sub> (b), T<sub>2</sub> (c), and T<sub>3</sub> (d). 'x' indicates PCR negative
